REQUEST FOR RECONSIDERATION AFTER FINAL

ASSISTANT COMMISSIONER FOR PATENTS WASHINGTON, D.C. 20231

SIR:

Responsive to the Final Office Action dated May 23, 2002, Applicants respectfully request reconsideration of the above-identified application in view of the following remarks.

Claims 1-18 remain pending in the application.

REMARKS

As claimed in Claim 1, the present invention is an aqueous polymer dispersion having a minimum film-forming temperature of below +65°C comprising at least one film-forming polymer in the form of dispersed polymer particles comprising a polymer phase P1 and a different polymer phase P2, the polymer dispersion obtained by free-radical aqueous emulsion polymerization comprising the following steps: i) polymerization of a first monomer charge M1 to give a polymer P1 having a theoretical glass transition temperature $T_e^{(1)}$ (according to Fox) and ii) polymerization of a second monomer charge M2 to give a
